UHA PREFERRED DRUG LISTING (PDL)

We are pleased to present you with the UHA preferred drug listing. The preferred drug listing is the cornerstone for a progressive program of managed care pharmacotherapy. Prescription drug therapy is an integral component of your patient's comprehensive treatment program. The preferred drug listing was created to ensure UHA members receive high quality, cost-effective, rational drug therapy.

UHA is responsible for developing and maintaining the preferred drug listing. In making its decisions, UHA utilizes local consultant physicians and pharmacists representing various medical specialties. In addition to clinical considerations, UHA evaluates the cost of treatment of therapeutically equivalent drugs and bioequivalency data provided by the Food and Drug Administration (FDA). With a primary consideration to provide a safe, effective, and comprehensive preferred drug listing, UHA evaluated all therapeutic categories and has selected the most cost effective agent(s) in each class.

The preferred drug listing development and maintenance is a dynamic process. UHA regularly reviews new and existing medications to ensure the preferred drug listing meets the needs of both members and providers.

We invite recommendations and comments on improving the content or format of the preferred drug listing. Physicians may request the addition of a new drug or a review of drugs for inclusion or exclusion from the UHA Preferred Drug Listing by submitting their request to:

COVERED MEDICATIONS

Unless otherwise limited by the plan, all dosage forms and strengths of a listed medication available at the time of printing are covered. In order to reduce the risk of adverse effects to our members, UHA will not cover prescription drugs when prescribed for experimental, investigational, or non-FDA approved indications unless they have sufficient peer-reviewed literature to support their use for the prescribed indication.

Drugs that are newly introduced are subject to a review period. Prior to evaluation, these drugs may be not covered, or may be subject to a higher co-payment.

GENERIC MEDICATIONS

UHA encourages the use of generic medications whenever possible and our open formulary includes all generics unless the specific classification of medications is an excluded category, such as weight loss medications. Please note that this Preferred Drug Listing does not list all covered generics. In order to help the Prescriber, the generic medications are listed according to their generic/chemical name as well as their previous "Brand" name. Where only the generic is listed, the Brand has been discontinued, but the generic is available. **Boldface** type indicates generic availability.

It is important to remember that this PDL's intent is to cover only the generic form of the drugs (cephalexin or "generic of KEFLEX") and not the Brand forms. **There is a higher co-payment for brand-name drugs that have an approved generic available.**
